Projects

A soft drinks order website.

Github link - [Fizzpop](#)

- Developed a dynamic landing page, "Fizz Pop," utilizing HTML, CSS, and JavaScript, to create an engaging and user-friendly interface for online soft drink ordering.
- Implemented an intuitive user interface, enabling customers to browse through available soft drink options and easily place their orders with a streamlined checkout process.

Weather App

Github link - [Weather App](#)

- Developed a weather application that allows users to check weather information for any location.
- Designed and implemented a user-friendly interface using HTML, CSS, and JavaScript to display weather data.

Food Order Website

Website link - [Foodmunch](#)

- Developed a responsive food order website using HTML, CSS, and Bootstrap, facilitating a seamless ordering experience for users on various devices.
- Implemented a user-friendly interface with an extensive menu, enabling customers to easily browse, add items to the cart, and place their food orders hassle-free.

Chatbot

Website link - [Chatbot](#)

- Created a dynamic chatbot using HTML, CSS, and JavaScript, with the support of Bootstrap for enhanced responsiveness and styling.
- Implemented natural language processing capabilities in JavaScript to enable the chatbot to understand user queries and provide relevant responses, enhancing user interaction and engagement

Popular Podcast Website

Website link - [Podcast](#)

- Designed a banner section and the project cards using different HTML block, inline elements.
- Styled the website using CSS3 properties such as background, flex, and CSS box model properties and relative units such as vh, vw, and used absolute units such as px.
